## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Capp (U. S. Patent 4,795,352).
3. Regarding claims 1 and 11, Capp, see figures 9-10, discloses an electrical connector comprising: a base portion 21 configured for mating to a plug assembly, wherein the interface portion 104 is configured for rotational movement to the base portion when a predetermined torque is applied to the interface portion. This torque would overcome friction.
4. Regarding claim 11, Capp discloses the base portion 21 and the interface portion 72 comprises a coaxial connector.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2- 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Capp in view of Nordstrom (U. S. Patent 4,046,052).

Regarding claims 2-19, Capp discloses the claimed invention except for a torque limiting member between the base portion and the interface portion, the torque limiting member configured to limit the torque transferred from the interface portion to the base portion. Nordstrom discloses a torque-limiting member 118 between the base portion and the interface portion. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Capp to provide the torque limiting member as taught by Nordstrom so as to prevent stress on the connector to the printed circuit board.

***Allowable Subject Matter***

7. Claims 20-25 are allowed.

8. The following is an examiner's statement of reasons for allowance:

9. None of the reference discloses a collar urging the torque limiting member, the base portion and the housing in contact with one another.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
